

PROFITABLE PERSPECTIVES WITH AZUR 2F

AZUR Solar is a successful international technology company and one of the leading full-line photovoltaics. With AZUR 2F, we are offering you an innovation opening up new and lucrative opportunities in the future market of photovoltaics!

Power Foil: AZUR 2F.
Photovoltaics quickly installed.

POWER FOIL

Wafer-thin and highly efficient: the solar high-performance module AZUR 2F.

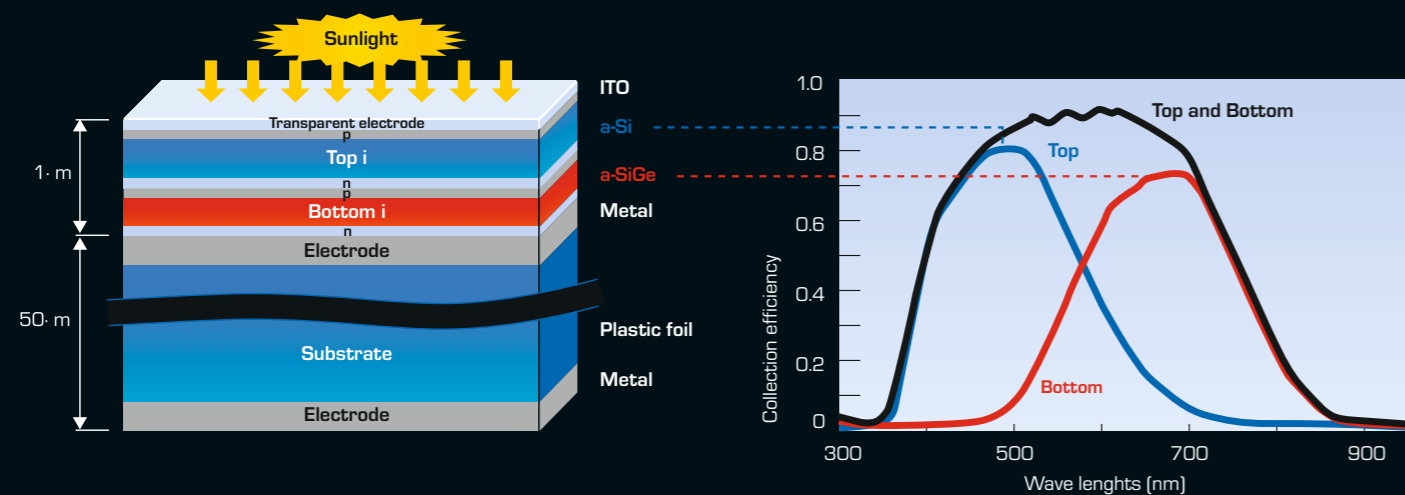

The photovoltaics company AZUR Solar presents the 1 mm thin power foil AZUR 2F, which has many advantages over "classic" photovoltaic equipment.

AZUR 2F can be installed on almost any type of roof, offering a maximum performance of 92 Wp at minimal expense.

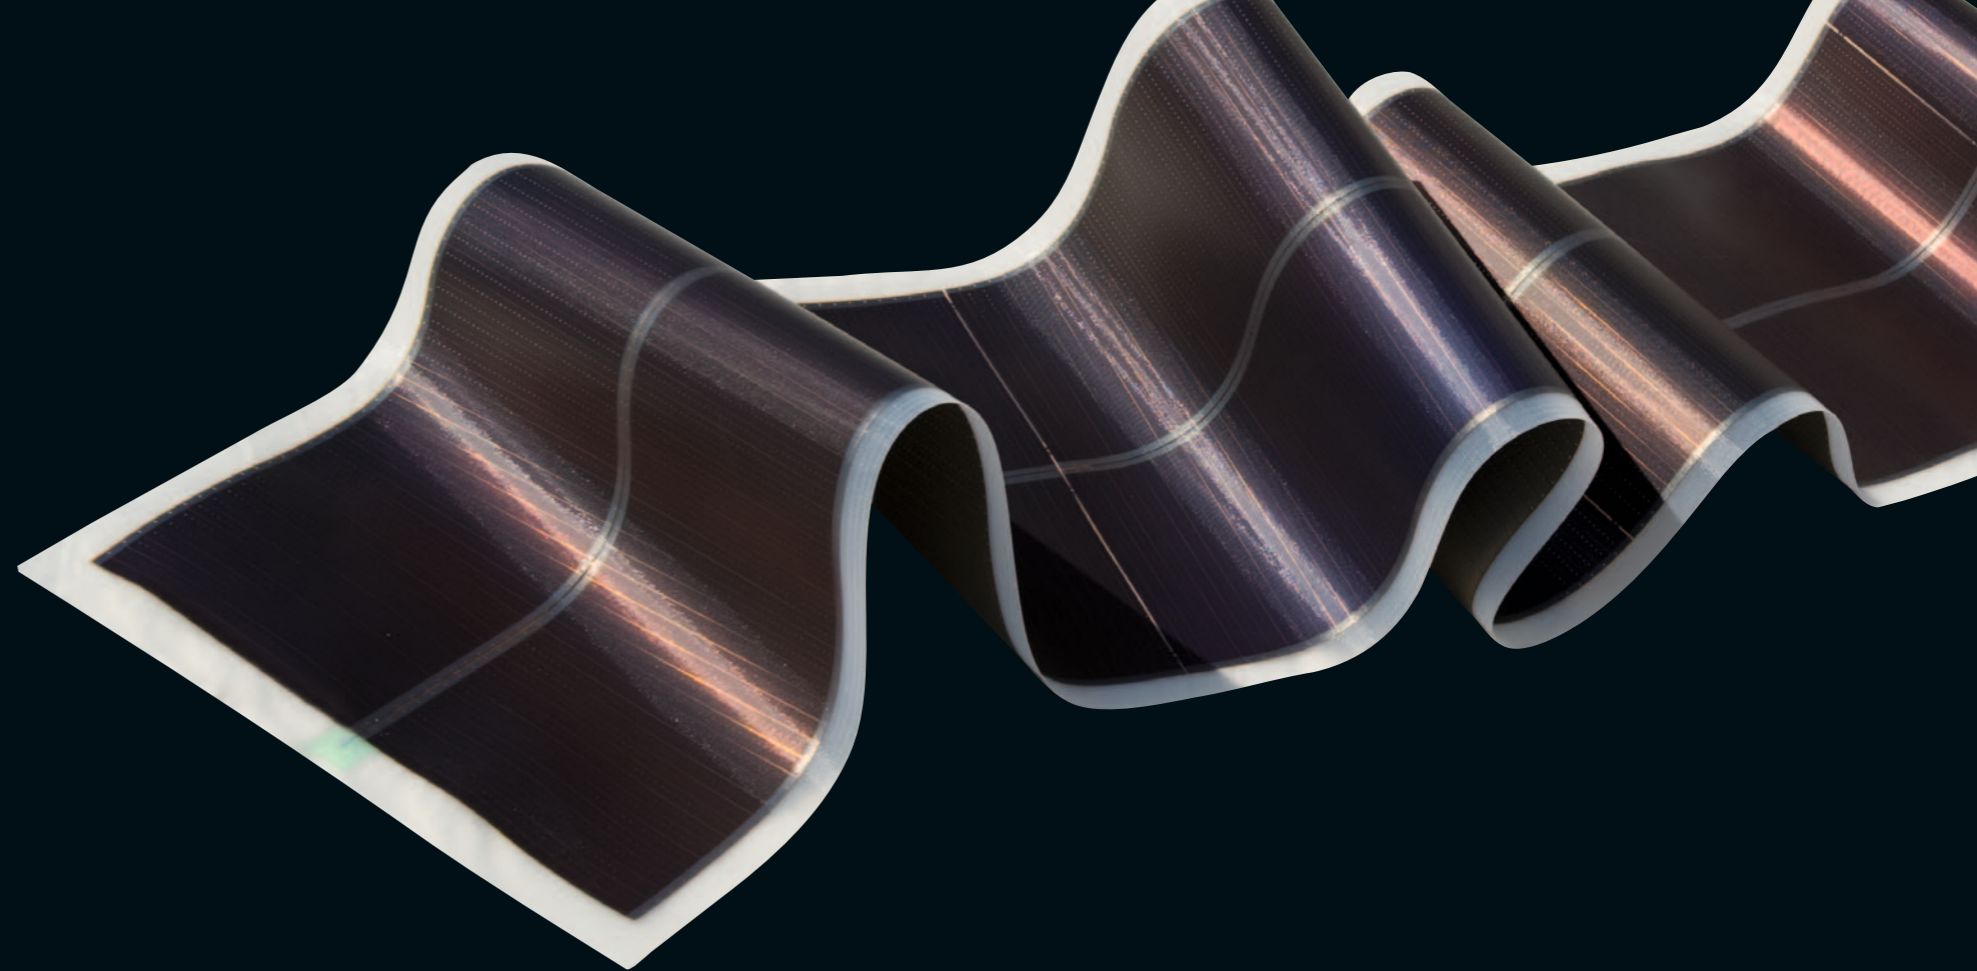

In addition, the AZUR 2F foil can be installed on buildings that can not withstand the weight of conventional solar panels. This is made possible by the low weight [foil only] of approx. 1 kg per square meter!

AZUR 2F: State of the art solar technology.

- Material: amorphous silicon solar cells
- Concealed on flexible unbreakable synthetic foil
- Solar cells are permanently encapsulated and joined
- 2 solar cells on top of one another for different spectral ranges
- Extraordinary performance: 92 Wp
- Direct foil connection to the inverter
- AZUR 2F foils are adaptable and durable
- Environmentally friendly, robust and weatherproof
- Manufacturer of the solar cells: Fuji Electric Systems
- VDE tested according to IEC 61730 and IEC 61646

AZUR 2F is the forward-looking PV combination of high efficiency and comfortable handling!

GLUEABLE

Photovoltaic systems are difficult to install? AZUR 2F is the solution!

The back of AZUR 2F foil is treated in such a way that it can be glued to the surface quickly and safely with adhesive tape. Exclusively at AZUR Solar: the innovative foil treatment which ensures a permanent bond of the AZUR 2F foil module and the adhesive tape.

AZUR 2F: quicker to install.

- Quick and reliable installation using double-sided adhesive tape, made of butyl rubber
- Strong adhesive tape approved by the roofer guild
- Sensationally low weight: only approximately 1 kg/m² (foil only)
- No static load of roof or building constructions – perfect for extensive roof landscapes and industrial roofs
- Low-maintenance, conforms to norms

Additional mounting solutions can be offered – please contact us.
